DETAILED ACTION

1. Applicant's election of figures 11A-12B in reply filed on 06/23/2009 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 10-13, 18, 19, 21, and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Osborne et al. (US 5690642).

Note of figures 1-5 and 6A-6D, a catheter (10) comprises a catheter shaft (12) and a folded balloon (14) disposed at the distal end of the catheter shaft (12); wherein the folded balloon (14) forms a guide-channel (as shown in figures 6A-6D) configured to receive a guide-wire (26) during delivery of catheter (10); and a stent (30) mounted on the folded balloon (14) and distal end of the guide-wire (26).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Khairkhalan et al. (US 5409458) discloses in figures 12-19, a folded balloon catheter configured to receive a guide-wire. Van Der Leest et al. (US
